Adult Day Health is Saved Thanks to Snoqualmie Valley Hospital!

The Snoqualmie Valley Hospital has stepped forward to partner with our Adult Day Health Program to continue providing this important medical program. The commissioners of the Hospital District all spoke very highly of both the Center and the ADH program when this Director spoke to them, and voted unanimously to support the program by underwriting \$60,000 of the nursing staffing cost. They are committed to providing this support not just this year, but indefinitely. This is incredible news as it allows us to remain open, serving our most fragile and vulnerable seniors and adults.

Thanks to everyone who expressed their concern for the program, wrote letters, signed checks, asked for updates, and pulled for ADH. It continues on, thanks to our collective desire to see it serving the seniors among us who need it.
